

# Ready to Get Started?

Switching to Self-testing is easy for you and your doctor.

Most patients prefer patient self-testing because there are fewer visits to the doctor or laboratory—and no waiting for results!

## STEP 1

### **Your doctor sends in your patient information.**

Your doctor submits the Physician Order Form (your prescription) and Patient Authorization Form online to Remote INR.

---

## STEP 2

### **Remote INR confirms your coverage.**

We'll contact your insurance company and provide you with estimated out-of-pocket costs. If you decide not to pursue self-testing, we'll notify your doctor.

---

## STEP 3

### **Remote INR schedules your patient training.**

Remote INR schedules an in-person training by a certified healthcare professional or by your doctor's office staff. During training, you'll learn the importance of testing as prescribed and how to:

- Use the CoaguChek Vantus
  - Report your test results
  - Order supplies
- 

## STEP 4

### **Remote INR manages results and compliance.**

We'll collect and communicate all results and notify your doctor of out-of-range results. We also have a convenient program that helps keep you on your prescribed testing schedule and reminds you if you miss reporting a result.

---

## STEP 5

### **Remote INR provides ongoing service and support.**

We provide testing supplies to you and provide 24/7 technical support for the CoaguChek Vantus meter.
