

BioTel Heart EMR

Simple, Seamless EMR Integration for Cardiac Monitoring Data

Improve Your Practice's Efficiencies

- Reduce time to securely enroll cardiac monitoring services and access patient data—all transferred to your EMR as electronic HIPAA-compliant reports.
- Automated delivery of reports once they become available.
- Eliminate paper waste costs and reduce mistakes related to manual data entry—including billing.

Dedicated Team to Support Your Facility

- 15+ years of integration experience with most EMR systems including: Allscripts®, Cerner®, EPIC, GE Centricity/Muse™, Geneva Health Solutions, eClinical Works, NextGen®, Athena®, Epiphany Healthcare®, Meditech, and more.
- Commitment to your facility's success with support that begins during the entire implementation and training process that continues after go-live.

Best-in-Class Technology Providing Optimal Outcomes

- Flexible integration designs, including enhanced bi-directional, uni-directional or customized solutions.
- An efficient user experience with historical data storage, the ability to manage wearable and implantable technology, and Geneva Health Solutions integration with scheduling and DFT tracking.
